FRONT MOUNTED PIPE TRACKER DEPLOYMENT FRAME

Overview:

Tool Tec has developed a front mounted, retractable pipe tracker frame suitable for fitment onto a range of vehicles. Designed to take the TSS 440 array of coils and mounted in accordance with the manufacturer's recommendations.

Key Points:

- Up to 4000 MSW depth rating
- Fully retractable for safe ROV deployment & recovery
- Lightweight to ensure no additional buoyancy requirement
- Fully configurable to different vehicles (HD Version shown)
- Completely non-magnetic materials used within the critical range of the coils
- Adjustable framework to allow the coil distance from the ROV to be increased
- Easily dissembled to achieve small shipping foot print
- Securely mounts to vehicle on multiple points
- Optional failsafe retractable version available
