

TOOL TEC MULTI-PURPOSE TOOLING SKID

Overview:

Tool Tec's Multi-Purpose Tooling Skid is ideal for many applications and can be fitted directly to most WROVs. It comes fitted with a full width, hydraulically actuated basket which can be used for storing manipulator deployed tools. The rear and sides of the skid have ample open space to allow fitting of client required equipment such as an IHPU, pressure intensification module or compensators/bladders etc. and these can be easily accessed for adjustment or maintenance through the removal of the skids bolted structural outer members and modular buoyancy design.

Key Points:

- Compressive & tensile load tested aluminium framework.
- Configurable core / ROV interface to allow fitting to most WROVs.
- Wide, hydraulically actuated tool basket.
- Large space in rear and sides for fitment of dedicated tooling modules
- Standard depth rating of 3,000 msw buoyancy (can be configured to client requirements)
- Supplied neutrally buoyant as standard but additional payload capacity can be added if required
- Supplied with lifting adapters and sling set for ease of deck handling
